INTERNATIONAL
VASCULITIS & ANCA WORKSHOP

April 14 - 17 2013
"Institut des Cordeliers"
Paris - France

- **PRESIDENT'S ADDRESS**

Over the past 3 decades, much progress has been made in the field of vasculitis. Since the discovery of ANCA, the pathogeneses of vasculitides are better understood and treatment strategies have improved. ANCA testing has taken a major place in the diagnosis and follow-up of patients and new biomarkers are now being studied for diagnostic, prognosis and classification purposes. Therapeutic trials focusing on the optimization of conventional therapies and the evaluation of new drugs have modified the prognoses of these diseases and patients' outcomes.

Every 2 years, the vasculitis community participates in the International Vasculitis and ANCA Workshop and, 25 years after our first meeting, we can clearly measure the advances made by researchers and clinicians.

The next International Vasculitis and ANCA Workshop is scheduled to be held in Paris, 14–17 April 2013. It will provide you the opportunity to meet the opinion leaders and physicians involved in vasculitis care.

I sincerely hope that you will be able to participate in this stimulating congress.

With my best regards,
Professor Loïc Guillevin, Congress President
